

Carbon Reduction Plan

Supplier name: Simwood Group PLC

Publication date: 10/01/2023

Commitment to achieving Net Zero

Simwood Group PLC is committed to achieving Net Zero emissions by 2050

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021	
Additional Details relating to the Baseline Emissions calculations.	
This is the first time we have reported our carbon footprint so this calculation establishes our baseline. It is based on our financial accounting year of December to November	
Our Baseline calculation includes: <ul style="list-style-type: none">• Scope 3 Categories: 1: Purchased goods and services: 3: Fuel and energy related activities: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking:	
Our Baseline deviates from the requirements under PPN 06/21 as follows: <ul style="list-style-type: none">• Scope 1: Direct Emissions is not included as Electricity used for heating, No Bioenergy used, No Process & Fugitive Emissions produced, Company vehicles are electric. Scope 2: Indirect Emissions is not included as Renewable electricity used to power office and car, No heat or steam is purchased. Scope 3: Category 4: Upstream transportation & distribution: is not included as No transport paid for by the company. Scope 3: Category 9: Downstream transportation & distribution: is not included as No transport paid for by the customer.• Scope 3: Category 1: Purchased goods and services: is included as Cloud services, Insurance, legal activities, Website page views, Cloud storage, handsets. Scope 3: Category 3: Fuel and energy related activities: is included as Well to tank transmission losses.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e
Scope 2	0 tCO ₂ e
Scope 3 (Included sources as detailed above)	35.2 tCO ₂ e
Total Emissions	35.2 tCO₂e

Carbon Reduction Plan

Current Emissions Reporting

Reporting Year: Dec 2020 to Nov 2021	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0 tCO ₂ e
Scope 2	0 tCO ₂ e
Scope 3 (Included sources as detailed above)	35.2 tCO ₂ e
Total Emissions	35.2 tCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 29.1 tCO₂e by 2026. This is a reduction of 17.2 %

Progress against these targets can be seen in the chart below:

Carbon Reduction Plan

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the baseline and the measures will be in effect when performing the contract.

- Switched to 100% renewable electricity to power offices

Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Reduce Scope 2 emissions by 4.2% each year by switching computers and monitors off at night and weekends
- Contribute to 4.2% reduction in Scope 2 emissions by installing new air heating/cooling control panel to turn heating/cooling blowers off at night
- Reduce Scope 3 IT Services emissions by 4.2% each year by conducting review of software licences and cancelling redundant ones
- Reduce Scope 3 commuting emissions by 4.2% each year by implementing working from home 1 day per week
- Minimise Scope 3 business air travel by utilising/training staff already in US
- Reduce Scope 3 TB Cloud storage by 4.2% each year by reviewing email policy and deleting anything over 5 years old

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
